

All your prevention. One simple question.

Ethos and Magnus, the assistants in Sabentis Prime and Sabentis Smarthub. Talk to them as you would to a colleague and get answers with sources, data and reports ready to share.

How do I report a serious and imminent risk?

Stop the activity and report it immediately to your manager and the prevention service, following your procedure.

SOURCES

 OSH Manual · §4.2

 Coordination Procedure · p. 12

SUGGESTIONS

What measures should follow?

Who should record it?

✱ That simple. That is all.

 Natural language

 Cited sources

 Your organisation's data

 One-click reports

01 From searching to asking

The information was always there: in manuals, procedures and records. Reaching it was the hard part.

Two decades of documents and data lay dormant in folders. Now they answer.

🕒 BEFORE

- 🕒 Search for a clause in a 200-page manual.
- 📄 Export to Excel and cross-reference data by hand.
- 📅 Build the accident report late on a Friday night.

⚡ NOW

- ✓ Ask and get an answer with its source in seconds.
- ✓ The chart, table or map is created in the conversation.
- ✓ The report is ready to share as PDF, Word or Excel.

Why it matters

3 million

people die worldwide each year from work-related accidents and diseases.

395 million

workers suffer non-fatal injuries every year.

4% of GDP

worldwide is lost through the working days these cause.

Source: ILO, A call for safer and healthier working environments (2023).

The sector agrees: AI applied to prevention earns trust only with **traceability, quality data and human oversight** (Verdantix, 2025–2026). Ethos and Magnus are built on exactly that foundation.

02 Ask. They take care of it.

No need to learn a new tool or choose an engine: each assistant is defined by the questions it answers.

What does the standard say? How should I act?

REGULATIONS · PROCEDURES · CRITERIA

E Talk to Ethos

- ✓ Answers based on your manuals, guides and procedures
- ✓ Every claim cites its source: document, section and page
- ✓ Related questions help you explore further

How many? Where? How are they changing?

FIGURES · TRENDS · REPORTS

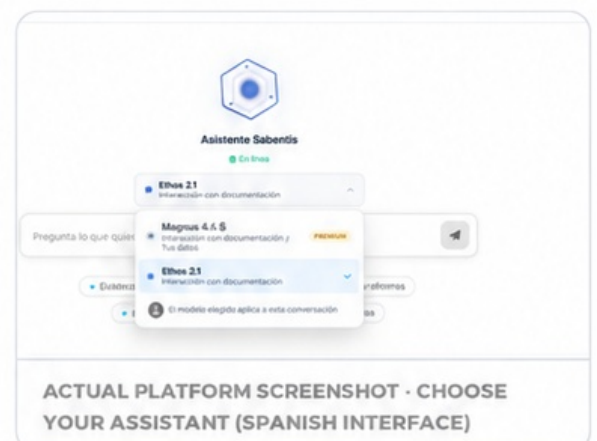

M Talk to Magnus

- ✓ Queries and analyses your organisation's OSH data
- ✓ Charts, tables and geographic maps in moments
- ✓ PDF, Word and Excel reports ready to share

✱ **Unsure?** Start with Magnus: it includes everything in Ethos and adds analysis of your data. You cannot choose wrong.

APPENDIX · CAPABILITIES IN DETAIL

Capability	E	M

Document search with cited sources	✓	✓
Exact section and page references	✓	✓
Follow-up suggestions and context memory	✓	✓
Analysis of your organisation's data	—	✓
Charts, tables and geographic maps	—	✓
Downloadable PDF, Word and Excel reports	—	✓
Share reports and files	—	✓

03 In action: ask as you speak

Real conversation examples. Ask in your own words and get answers with data, sources and the format you need.

E Ethos ANSWERS WITH SOURCES

What PPE does our manual require for welding?

Welding helmet, leather gloves, flame-resistant apron and safety footwear. **The helmet is also mandatory** for the assistant.

SOURCES [PPE Manual · §7.3](#)

[Welding Sheet · p. 4](#)

SUGGESTIONS [How often are they checked?](#)

[Who issues them?](#)

M Magnus REMEMBERS CONTEXT

How many accidents were there in March?

18 accidents were recorded in March.

And how many involved sick leave?

7 of the 18 resulted in medical leave.

Was this helpful? [👍](#) [👎](#)

M Magnus CREATES A CHART IN MOMENTS

Show me absences by month.

Here is the trend in absences for the six-month period:

ABSENCES BY MONTH · JAN-JUN

04 Never provide a figure you cannot defend

That is the design standard. Every answer shows its origin: the exact document or live data from your platform.

Traceability first

Every document-based claim cites its source: document, section and page. You can check where each fact comes from before making decisions.

Live data, not snapshots

Figures, charts and reports use the real data in your platform and are up to date when they are created.

Human oversight

The assistants assist; they do not decide. You validate each answer and your feedback helps improve the assistance.

Within your workflow

They work inside Sabentis Prime and Smarthub: no switching tools, no manual data exports and no losing context.

How they do it

1

Understand

Your question, in your language, and the intent behind it.

2

Search

Your documentation and, with Magnus, your data.

3

Substantiate

An answer with sources, in the format you request.

Where does my data go? Ethos and Magnus operate entirely within the Sabentis platform, using your organisation's documents and data. Your data stays within your environment and is not used to train third-party models.

05 Visual analytics: from question to result

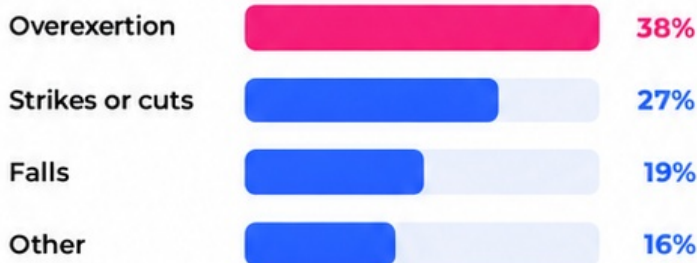

Every chart starts with a sentence. Ask Magnus for a table, breakdown or map and explore it directly in the conversation.

“Which sites have the most accidents this year?”

SITE	ACCIDENTS	RATE
North Plant	214	42.1
South Warehouse	168	33.7
Central Workshop	141	28.9

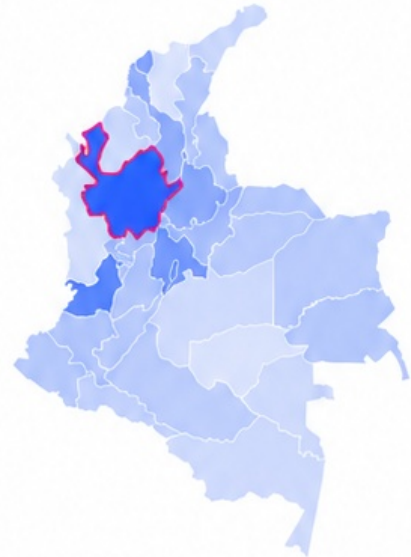

Incidence rate per thousand workers.

“Break down accidents by injury type.”

Breakdown for the last year. The leading factor is highlighted as the priority for action.

“Show accidents by department in Colombia.”

low high

Period focus: Antioquia

Interactive map in the platform: each department is coloured by its number of accidents. Zoom in, explore and filter.

06 A report ready to share

Ask Magnus for a report and it brings together indicators, charts and tables in a document with your branding, ready to export in one click and share.

To confirm

Share it with your team or download it as **PDF, Word or Excel** without leaving the conversation.

07 Start today

Five habits improve the quality of answers from day one. Getting started does not require a project.

Be specific

The clearer you are about dates, sites or data types, the better the answer.

Ask for the format you want

A chart, map, table or downloadable report: you choose how to see it.

Build on your questions

Use context memory to refine your questions gradually, just like a real conversation.

Check the sources

When documents are cited, check where each fact comes from before accepting it.

Give feedback

Rating answers helps improve the assistance for you and your team.

📌 Prompts to try today

"Summarise the working-at-height procedure and cite the source."

"What PPE does our manual require for welding?"

"Compare accidents in 2024 and 2025 by site."

"Which department has the most accidents this quarter?"

"Generate an Excel report of absences in the last quarter."

"Chart incidents without lost time by month."

Activate them today

- 1 Available in **Sabentis Prime** and **Sabentis Smarthub**, within your platform.
- 2 Speak to your Sabentis contact or reach us through **sabentis.com**.
- 3 Ask for a **live demo**: the best way to see them is to ask them something.

sabentis.com/en/

20 years of prevention.
Now it answers you.
